

# De-Acne Cream

## For Clear Face

**Unique Herbal Actives**  
Heals, Repairs, Renews

## OrganoMED De-Acne Cream – Advanced Care for Clear, Healthy Skin

OrganoMED De-Acne Cream is a scientifically formulated solution designed to effectively treat persistent acne, reduce scars and blemishes, and restore skin clarity. With its unique blend of active ingredients, this cream works to control sebum production, minimize shine, and prevent clogged pores—key factors in managing oily and acne-prone skin.

### Main Features (Product Strength Points)

Unique Herbal Actives

Heals, repairs, renews

Best solution for oily and greasy skin problems.

Gets rid of acne marks and dull skin.

Helps dry up acne.

### Key Ingredients Benefits

#### Dead Sea Salt

Natural antibacterial and anti-inflammatory can help keep breakouts under control.

#### Thyme Extract

Thymol provides antioxidant, anti-inflammatory, and antimicrobial effects—excellent properties for treating acne.

#### Aloe Vera Extract

Antibacterial, anti-inflammatory and antioxidant remove bacteria from the skin, reducing the risk of spots developing.

#### Green Tea Extract

Green tea, made from unfermented *Camellia sinensis* leaves, is especially rich in EGCG, which protects against oxidative stress, UV damage, and inflammation.

#### Rose Water

Anti-inflammatory properties can help reduce skin redness, prevent additional swelling, and soothe the discomfort of acne. Gentle astringent that helps tighten pores.

#### Salicylic Acid

It exfoliates the skin, accelerates keratinocyte turnover, and is commonly used for both inflammatory and non-inflammatory acne and oily skin.

#### Witch Hazel Extract

Anti-inflammatory and astringent properties, making it effective for acne treatment. It soothes irritation by constricting blood vessels, reduces swelling, absorbs excess oil to prevent breakouts.

#### Willow Bark Extract

Willow bark extract is a gentle exfoliant with antibacterial, anti-inflammatory, and antioxidant properties. It contains salicin natural source of salicylic acid (reduces acne & aging).

#### Sage Extract

Anti-inflammatory Properties, Antibacterial Properties, Moisturizing Properties, Astringent Properties

#### Vitamin E

A study on 98 patients showed that vitamins E and C corrected keratinization defects, preventing comedones and bacterial growth.

**Tea Tree Oil** Tea Tree Oil is a popular natural alternative to medicated acne treatments due to its antibacterial and anti-inflammatory properties.

"Studies show Tea Tree Oil works as well as %5 benzoyl peroxide and %2 erythromycin, with similar side effects. It is the second most popular acne treatment after %2.5 benzoyl peroxide, making it a common choice for self-treatment."

#### Licorice Root Extract

A study on 98 patients showed that vitamins E and C corrected keratinization defects, preventing comedones and bacterial growth.

### How to Use

After cleansing, apply De-Acne Cream twice daily, morning and night.
